GitHub: github.com/annmariyarosepereira **Mobile:** +91-6235701868

Skills

- **Languages**: C, C++, Java, Python
- **Frameworks & Libraries**: HTML and CSS
- **Tools & Platforms**: MySQL, Power BI, Microsoft Excel, Jupyter Notebook
- **Soft Skills**: Time Management, Analytical Thinking, Problem-Solving, Adaptability, Quick Learner

Projects

Interactive Dashboard – Global AI & Data Job Market Intelligence | **GitHub** Nov' 25 – Dec' 25

- 1,000+ real AI and Data job postings using Power BI to uncover hiring trends, in-demand technical skills, salary patterns, and role-wise requirements, enabled a comprehensive understanding of the current job market landscape.
- Executed an industry-standard star schema with a bridge table and built advanced DAX measures such as skill demand, average salary, and recent hiring trends to enable accurate many-to-many skill analysis and improved reporting reliability.
- Configured a fully interactive multi-page Power BI dashboard with KPIs, dynamic slicers, matrices, and career guidance visuals to support data-driven career planning and informed decision-making for aspiring professionals.

  Tech stack: Excel, Data modelling, DAX, Power BI

Customer Segmentation – Customer Analytics and Machine Learning Project | **GitHub** Jun' 25 – Jul' 25

- Performed comprehensive end-to-end data preprocessing, advanced cleaning, and feature engineering on 3,900+ customer records using Python libraries to ensure high-quality, analysis-ready datasets for downstream analytical workflows.
- Applied K-Means clustering to segment customers into four distinct behavioral groups, improved marketing insight accuracy by 30% through deeper and more precise customer profiling and targeted analysis insights for strategic marketing decisions.
- Designed and developed an interactive Power BI dashboard with 12+ dynamic visuals, delivered clear insights into purchasing trends, cluster distributions, and critical KPIs to support data-driven decision-making for business stakeholders.

  Tech stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Power BI

Photography Guidance Bot – AI and API-Based Desktop Assistant Project | **GitHub** Mar' 25 – Apr' 25

- Built a real-time desktop assistant that provides intelligent photography tips using AI-driven insights and real-time weather data, improved image quality by 25% through guided camera settings and automated recommendation accuracy.
- Integrated the OpenWeatherMap API to fetch real-time weather data and generated dynamic ISO, aperture, and lighting suggestions for adaptive photography decisions and accuracy optimization across varying environmental conditions.
- Implemented RGB histogram analysis and image enhancement using PIL and Matplotlib, enabled 256-level color distribution analysis and increased overall image clarity by 15% with measurable visual quality improvements.

  Tech stack: Python, Tkinter, Pillow (PIL), Matplotlib, OpenWeatherMap API

Training

Skill Development LPU – Data Science | **Certificate** Jun' 25 – Aug' 25

From Data to Decisions : A Hands-On Approach to Data Science

- Gained hands-on experience in Python-based data analytics, including data preprocessing, EDA, statistical modeling, feature engineering, and machine learning using Python libraries for real-world data problem solving.
- Worked with MySQL, Excel, and Power BI for data handling, extensive cleaning, query-based analysis, and building interactive dashboards with KPIs, slicers, and drill-down visuals to support data-driven decision-making.

  Tech stack: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), MySQL, Microsoft Excel, Power BI

Certificates

- Cloud Computing | NPTEL | **Link** Nov' 25
- 100 Days of Code: The Complete Python Pro Bootcamp | Udemy | **Link** Feb' 24
- Responsive Web Design | Free Code Camp | **Link** Nov' 23

Co - curricular activities

- Completed a 4-week AI and Cloud Computing training program with hands-on practical exposure and project-building. Aug' 25
- Attended a cybersecurity symposium at LPU, gaining insights into key attacks, defense practices, and security measures. Mar' 24
- Secured a top-10 rank among 200+ teams by delivering an efficient solution in a 24-hour hackathon. Feb' 24

Education

Lovely Professional University Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; ***CGPA: 6.94*** *Aug' 23 - Present*

St. Sebastian's Higher Secondary School Kochi, Kerala
Intermediate; ***Percentage: 97.4%*** *Jun' 20 – Apr' 22*

St. Sebastian's Higher Secondary School Kochi, Kerala
Matriculation; ***Percentage: 100%*** *Jun' 19 - Apr' 20*
