SKILLS

- **Languages:** C, C++, Java, Python, Javascript
- **Frameworks & Libraries:** HTML, CSS, React.js, Node.js, Express.js, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
- **Tools & Platforms:** MySQL, Power BI, Microsoft Excel, Machine Learning, Data Analytics
- **Soft Skills:** Time Management, Analytical Thinking, Problem-Solving, Adaptability, Quick Learner

PROJECTS

Aesthetic Ann Anti-Tarnish Jewelry – Full-Stack E-Commerce Platform | GitHub

Jan' 26 – Feb' 26

- Designed and deployed a comprehensive MERN-stack e-commerce web application featuring a dynamic product catalog, individual product detail pages, and a secure shopping cart, enabling a seamless end-to-end user shopping experience.
- Executed secure JWT-based user authentication and integrated PayPal's REST API for real-time payment processing, ensuring secure online transactions and reliable order state management within the MongoDB database.
- Engineered a high-performance frontend using React and Vite, implementing intelligent state management with React Context API and Axios interceptors to deliver a fast, responsive, and seamless user interface.

Tech stack: MongoDB, Express.js, React, Node.js, Tailwind CSS, PayPal API, REST APIs

Customer Segmentation – Customer Analytics and Machine Learning Project | GitHub

Jun' 25 – Jul' 25

- Performed comprehensive end-to-end data preprocessing, advanced cleaning, and feature engineering on 3,900+ customer records using Python libraries to ensure high-quality, analysis-ready datasets for downstream analytical workflows.
- Applied K-Means clustering to segment customers into four distinct behavioral groups, improved marketing insight accuracy by 30% through deeper and more precise customer profiling and targeted analysis insights for strategic marketing decisions.
- Designed and developed an interactive Power BI dashboard with 12+ dynamic visuals, delivered clear insights into purchasing trends, cluster distributions, and critical KPIs to support data-driven decision-making for business stakeholders.

Tech stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Power BI

Global Attention Shift Predictor - Machine Learning Streamlit Web Application | GitHub

May' 25 – Jun' 25

- Constructed a Human Attention Index by aggregating, normalizing, and standardizing four heterogeneous digital signals including search, video, social, and screen-time data across 350+ time points to capture comprehensive attention dynamics.
- Implemented machine learning models using Linear Regression and Logistic Regression to forecast 7-day attention trends and classify next-day behavioral shifts, supported by robust quantitative evaluation metrics for model performance validation.
- Engineered an interactive analytics web application built using Streamlit, featuring EDA visualizations, key performance indicators, and user-driven prediction tools to enable real-time insight generation and exploratory analysis.

Tech stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Streamlit

TRAINING

Skill Development LPU – Data Science | Certificate

Jun' 25 – Aug' 25

From Data to Decisions : A Hands-On Approach to Data Science

- Gained hands-on experience in Python-based data analytics, including data preprocessing, EDA, statistical modeling, feature engineering, and machine learning using Python libraries for real-world data problem solving.
- Worked with MySQL, Excel, and Power BI for data handling, extensive cleaning, query-based analysis, and building interactive dashboards with KPIs, slicers, and drill-down visuals to support data-driven decision-making.

Tech stack: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), MySQL, Microsoft Excel, Power BI

CERTIFICATES

- Cloud Computing | NPTEL | [Link](#) Nov' 25
- 100 Days of Code: The Complete Python Pro Bootcamp | Udemy | [Link](#) Feb' 24
- Responsive Web Design | Free Code Camp | [Link](#) Nov' 23

Co - CURRICULAR ACTIVITIES

- Completed a 4-week AI and Cloud Computing training program with hands-on practical exposure and project-building. Aug' 25
- Attended a cybersecurity symposium at LPU, gaining insights into key attacks, defense practices, and security measures. Mar' 24
- Secured a top-10 rank among 200+ teams by delivering an efficient solution in a 24-hour hackathon. Feb' 24

EDUCATION

Lovely Professional University

Bachelor of Technology - Computer Science and Engineering; CGPA: 7.04

Phagwara, Punjab

Aug' 23 - Present

St. Sebastian's Higher Secondary School

Intermediate; Percentage: 97.4%

Kochi, Kerala

Jun' 20 – Apr' 22

St. Sebastian's Higher Secondary School

Matriculation; Percentage: 100%

Kochi, Kerala

Jun' 19 - Apr' 20
